Dear Chris:

As a follow up to an earlier email in February regarding the Hollywood Media BID's decorative light standards which are located on Highland Avenue as well as Santa Monica Boulevard. As of right now, the Hollywood Media District has had two (2) hit and runs into our decorative light poles. The Bureau of Street Services has removed pole both on separate occasions - the first one on February 1st, 2016 and the 2nd one one March 4th. How does the BID go about having this lights replaced.

1. Location #1 - Occurred on February 1st, 2016

West Side of Street

1139 Highland Avenue, Hollywood, CA 90038

2. Location #2 – Occurred on March 4th, 2016

West Side of Street

1001 N. Highland Avenue (@Romaine)

3. There are numerous cones at the North West Corner of Highland and Santa Monica near the bus shelter. I have been told that this is from Street Lighting. Can you please confirm if there is a light standard that is missing. There are exposed wires of sorts and I cannot seem to get an answer from the City family.

Thank you for your assistance. Look forward to hearing back on how we can have the decorative lights reinstalled.

Regards,

Lisa Schechter

Executive Director

Hollywood Media District BID
